The people who attend the state fair to be
held in Wichita next week, who come
from the surrounding towns and cities, are
the people who read the EAGLE. A large
majority of them read the daily paper, and
they are reading up in advance. Now is the
time to reach these people while they are
in the home. When they arrive they have
made up their minds where they want to
buy from reading the EAGLE. The EAGLE
ventures the assertion that 90 per cent of

WE LIVE LONGER

Americans in Particular Live Much
Longer Than in Past Ages.

Remarkable Instances of Extreme Old
Age—Intellectual Activity & No
Bar to Long Life and
Good Health.

A writer in the Washington Post
calls attention to the many instances
of remarkable longevity which from
year to year have been reported. Passing
by the hundreds of years asserted
to have been lived by the antediluvian
heroes of Hebrew tradition, the appar-
ent numbers in which may mean some-
thing entirely different from what
they would mean in our decimal scale
of enumeration, and down through the
Greek and subsequent ages, whose
method of counting we do not under-
stand, we find a continuous record of
persons arriving at an advanced old
age. These, from one point of view,
constitute a very small minority, and
yet, from another, form a considerable
and important element.

The number of deceased persons who
had attained an exceptional old age
was probably greater in the year 1893
than in any recent period. During the
last three or four months of the year
the general public became familiar
through a perusal of the daily papers
with the remarkable obituaries of
those who had departed, having lived
to a great old age. A month or so
since we read of a life that had reached
the extraordinary limit of one hundred
and thirty-five years. We have since
read of the death of a woman at Har-
ford, Conn., who was old enough to
give warning of the approach of the
British fleet in 1812, and so saved the
New England coast from threatened
devastation. And still later we have
been apprised of the death at Terre
Haute, Ind., of a man 104 years old,
who attended the funeral of Washing-
ton, cast his first vote for Madison and
was a soldier in the war of 1812. From
other data it is apparent that great
longevity has been on the increase for
many years, particularly in America.

But it may be remarked that these
persons up to the centennial mark or be-
yond were formed very many years be-
fore Americans began living at the
present rate, and that the best part of
the modern suicidal rush of the so-
ciety and business worlds. To have a
good chance for longevity it is almost
unnecessary to say that an originally
good constitution is of the first im-
portance, though to this primary ex-
cellence carefulness in the art of living
must be added. The secret of long life
is one of which nature alone holds pos-
session. A remarkable fact is that in-
tellectual activity and success have
been barriers to long life. Even the
deepest philosophical studies have proved
a help rather than a hindrance to men
of literary pursuits. Voltaire, who at
birth was put into a quart pot, could
never have attained his eighty-fourth
year had he not followed the strict,
sober, active life which he chose. Glad-
stone exercises the highest powers of
successful statesmanship at an age of
eighty-four years, after having under-
gone the constant turmoil of political
contest for considerably more than half
a century. Bismarck is practically an
octogenarian. Von Moltke was
seventy-nine when he died. It seems
that the review of these and numerous
other instances would sufficiently es-
tablish the theory that continuous in-
tellectual activity is conducive to the
perpetuation of good health and the
prolongation of life.

LOST HIS RED BUTTON.

The Former Chinese Minister to This
Country Degraded in Rank.

In a telegram from Peking, published
by the Chinese Mail, it is said that an
imperial edict has been issued an-
nouncing the degradation of Tsai Kwo
Yui, the former Chinese minister to the
United States, Spain and Peru, from
the post of "Tso Shu Tsze," a
senior deputy supervisor of instruction
to that of "Ching Wan," under secre-
taryship of the Hanlin college, as well
as the deprivation of the red button of
second rank, which he had been hon-
ored by the emperor on the occasion of
his being accredited to the courts of the
United States, Spain and Peru.

The issue of this edict has been the
result of the duties of "Tso Shu Tsze,"
as well as of his failure in passing the
recent special examination for promo-
tion among the members of the Hanlin
college. This special examination was
instituted at the instance of the board
of censors with a view to classifying
the members of the Hanlin college and
to investigate their special conduct,
and also for the purpose of recommend-
ing promotion. Consequently the per-
sons examined have, after due examina-
tion, been divided into three classes.
Those of the first two classes have
either received their promotion or ap-
propriate imperial rewards of silk
pieces, but Tsai Kwo Yui, who stands
first in the third class, has lost his
red button, and has suffered the
above-mentioned degradation in his
official rank.

SOUTHERN PLANTATIONS.

Conducted Differently from the Way They
Were Managed Under the Old Regime.

Plantations at the present day are
conducted very differently from the
way they were managed under the old
regime. The owner has in mind com-
prising something over five thousand
acres. The proprietor reserves about
two hundred and fifty acres for his
own planting and rents out the re-
mainder to small farmers, who give
him some pounds or bales of cotton
for the rent, in proportion to the quan-
tity and quality of the particular piece
of ground they cultivate, the size of
house and corn house of which they
have the use, etc. Much discrimina-
tion is required in the selection of ten-
ants, for defective or indifferent farm-
ing will impoverish the land and en-
danger the landlord's chances of col-
lecting his rent. Most of the tenants
are negroes, forty families of that race
residing on the place.

Of these, says the Boston Transcript,
there are a number who are excellent
farmers, thrifty, industrious, prompt
in paying their obligations, and thor-
oughly interested in everything that
pertains to their business, the wife
working as hard as her husband—hard
in fact, because when her field work
is over she cooks the simple meals

washes the clothes and patches the gar-
ments for her numerous family by the
blaze of a light wood torch, after the
members of the household are rolled in
their respective "quilts" and voyaging
in slumberland. She does more than
this, for she raises chickens and tur-
keys, sometimes geese and ducks, using
the eggs for pocket money and to ob-
tain the tobacco which is as necessary
to her comfort as to that of her hus-
band and sons.

The majority of the negroes go to
work in the early morning, with no
breakfast, or perhaps only a crust to
nibble on. When they come in, at
twelve o'clock, a stirabout is made in
a dish concocted of corn meal, salt and
water, and looking very much as the
name suggests) of which all the family
partake, the elder members eating an
"allowance" of bacon. Any luxuries
they may enjoy appear at the evening
meal, such as coffee, flour, etc. Usually,
however, their fare is of the simplest,
and cold water their beverage, except
on Sundays and high days, celebrated
usually with reference to some reli-
gious festival. Too much credit cannot
be given these hard-working wives and
mothers, who hoe, rake, cook, wash,
chop, patch and mend, from morning
until night. Very often garments will
be patched until scarcely a trace of the
original foundation material can be
seen, and there are many cases where
the wife is much the best "sutton chop-
per" of the two, and her work far more
desirable than her husband's.

ONLY A SCRATCH NEEDED.

The Frequency of Blood Poisoning Among
the Meat Packers.

"It would surprise you to know," re-
cently remarked an officer of one of
our large packing houses, says the New
York Sun, "how frequent cases of
blood poisoning are among our em-
ployees, and the cause in most of these
instances would doubtless surprise you
more. A scratch on the hand from a
bone of a calf's head or a pig's foot
often disables a man for a week, and,
strangely enough, in almost every case
that has come under my notice the
scratch has been so slight as to be al-
most imperceptible."

"The first intimation the man has of
his injury is a swelling of the forearm,
accompanied by a smarting pain. Then
swelling and pain generally extend to
the shoulder, under which a large lump
sometimes forms. Even after the pres-
ence of the scratch has been in this
manner demonstrated it is often im-
possible to detect it. It is usually
caused, in the case of the calf's head,
by the sharp edge on the bone of the
neck, due to the carelessness of the
butcher who severs the head from the
carcass. If he does his work well and
his cleaver has severed the joint per-
fectly, all is well, for there is no sharp
edge to cut; but if he has missed the
joint by even a half's breadth, which
happens in five cases out of ten, there
is an edge on the bone that will prob-
ably hurt mischief."

"Of course, none of these cases has
ever resulted seriously, as prompt
measures are always taken, and as we
always insist that a man so injured im-
mediately consult a physician. This
rule we never vary, for we feel bound
to retain a man on the payroll while
suffering from such an accident, even
though he be unable for work, and the
unskillful treatment of an apothecary,
on which many of them would like
to rely, or the even less sat-
isfactory methods of home surgery,
would only prolong the term of idleness."

PUNISHED FOR CURIOSITY.

The Penalty Inflicted by the Empress
Dowager of China.

It is dangerous to gratify curiosity
or to violate precedent at the Chinese
imperial court. The empress dowager
is a great stickler for etiquette, says
the New York Sun. Recently she re-
quired the services of Dr. Li Tchong,
vice president of the Imperial acade-
my of physicians, at Peking, for
some of the members of her suite at
Peking palace. The honored doctor had
never been inside these famous palace
grounds, and his curiosity was fired to
see the many curious objects of which
he had heard wonderful tales. So he
bribed a palace eunuch to show him
around the grounds.

While the two were leisurely walk-
ing about and enjoying themselves the
empress spied them. She at once dis-
patched servants to punish their
effrontery. The eunuch was seized,
thrown on his face and accommodated
with fifty blows with the bamboo on
the calves of his fat legs. The doctor
was ordered to pay the eunuch's fine
and received a severe reprimand, while his
assistant was ordered never to venture
again into the empress's presence.

"The affair created a sensation be-
cause of the high position of the phy-
sician and of the humiliating punish-
ment dealt out to him."

Where His Arm was Weak.

"What's the matter with Chapple?"
"Concussion of the brain. His mother
patted him on the head this morning."

St. Louis Offers a Continuous List of Attrac-
tions—Has Unparalleled Fair Facilities Com-
pared with the World's Fair at Chicago.
Way Oct. 6 to Oct. 10, 1894.

The successful series of carnival seasons
inaugurated by the citizens of St. Louis
some fifteen years ago, continue as ever
for the season of 1894, and from the morn-
ing of September 25 to the evening of Octo-

long list of standing attractions, and from
every point of view this season of high car-
nival will outshine all previous attempts.
The St. Louis exposition, the only one of
its kind in the United States that has
lived over after year after year, has re-
sults, will throw open its doors to the pub-
lic September 25, and remain in a state of
activity until the evening of October 30.
From that date until the evening of Octo-

a full complement of specialty artists will
perform on the stage of the Music Hall.
The great St. Louis Fair, which will
open Monday, October 1st, and continue
during the week, promises to afford many
pleasant surprises. The "Midway Plaza-

presented in full, and the people of the
west and southwest given an opportunity
to see in real life the inhabitants of every
civilized and uncivilized country on the
face of the globe.
